

ENVIROWARE
SOFTWARE SOLUTIONS

EnviroWare Generator simplifies hazardous waste manifesting for waste generators and transporters.

Manage Companies • Create Waste Steams • Print Manifests & Labels

The Solution for Haz/Mat

EnviroWare from Contemporary Software is a suite of products focused at helping companies manage and automate the procedures and paperwork necessary in dealing with hazardous waste materials. EnviroWare Generator is a simple to use, web-enabled version that allows waste generators and transporters to quickly and effectively create and manage the companies and waste profiles associated with the waste that they need to dispose of. Once created, it is a simple click of a button to create waste manifests and labels. Our manifests include state specific manifests, Canadian manifests, and even the new Universal Waste Manifest that will be required by the EPA in September of 2006.

EnviroWare Generator saves time and helps to reduce costly mistakes that can cost your company money. Companies that have multiple hazardous waste collection sites can automate the pick up request using EnviroWare's Service Request feature which allows users to quickly enter the type and location of waste pickups that need to be made.

EnviroWare's Haz/Mat Waste Management Suite

EnviroWare Enterprise

Enterprise waste management solution for cradle to grave waste profile tracking and reporting

EnviroWare Lite

Solutions for small, single waste disposal facilities

EnviroWare Generator

Web-based hazardous waste generator software with seamless ties to TSDFs

Imagine if you could:

- Eliminate re-keying or re-writing waste manifests
- Reduce haz/mat paperwork mistakes
- Schedule pickups from anywhere at your facility
- Easily print manifests and labels
- Comply with new EPA Universal Manifest regs
- Deploy in as little as a day with no hassles

On Demand Software

To save the hassles of buying hardware and deploying software, EnviroWare Generator is now available as a hosted application. This means that for a few hundred dollars a month you can get all the benefits of the software without any of the hassles of maintenance. Your users simply log in to a secure site that contains your version of the application with all of your data. When you are ready to print, you simply hit the print button like you would with any application on your desktop. The benefits of this are numerous. We take care of backing up your data... and you and your team can access the system from any computer connected to the internet.

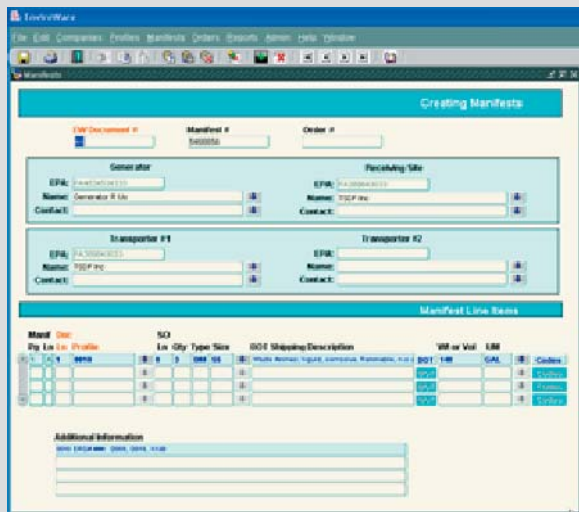

How to Get Started

What Our Clients Say:

"EnviroWare has improved our operational efficiency and our bottom line by streamlining our operations, reducing data entry and allowing easy access to real-time information, 24 hours per day. Use of the EnviroWare bar-code module has simplified regulatory compliance, reporting and performance auditing. From a managerial point of view, EnviroWare provides a crucial "dashboard" view into your operations based on real-time information in an integrated package."
Heather Harralson- US Filter

"By centralizing our data, EnviroWare has helped us be a more efficient organization. It allows us to be more proactive to our internal customer needs while building a permanent, trackable record of all waste that moves through our facilities."
Jack Marshall- PPG

"EnviroWare has linked many of our locations together on-line and has proven very valuable in making our facilities work together as a team. This has led to an increase in our ability to generate additional revenue while reducing our operational costs."
Thomas Baird- Giant Cement
